关于平均绩点（GPA）的说明

兹证明，我校采用平均绩点（GPA）的方式综合衡量学生的学习质量，其计算方法是：

课程成绩绩点 = (课程成绩 - 50) / 10 (课程成绩不及格绩点为 0)

课程学分绩点 = 课程成绩绩点 × 课程学分

平均学分绩点 = $\sum \text{课程学分绩点} / \sum \text{课程学分}$

The Instruction on Grade Point Average (GPA)

This is to certify that our university weighs students' study quality in the way of adopting GPA, whose computational method is that:

Course score point = (course score - 50) / 10

Course credit point = course score point × course credit

Grade point average = $\sum \text{course credit point} / \sum \text{course credit}$
